SUMMARY

Results-driven full-stack developer with over 4 years of hands-on experience in building scalable, high-performance web applications using MERN and MEAN stacks. Proficient in developing both client and server-side applications with modern JavaScript frameworks like React, Angular, and Next.js. Experienced in implementing best practices for SEO optimization to enhance web visibility and performance.

WORK EXPERIENCE

Frontend Engineer

DGLiger Consulting (May 2024-present)

- Developed web applications using Next.js and React.js, focusing on performance, scalability, and maintainability
- Implemented Accelerated Mobile Pages (AMP) and optimized for Core Web Vitals to enhance mobile performance
- Built SEO-friendly websites using server-side rendering (SSR) in Next.js to improve visibility and search rankings
- Optimized page load times, structured metadata, and Core Web Vitals to ensure a strong SEO foundation
- Ensured cross-browser and cross-device compatibility for consistent user experiences

Full Stack Developer

OTS Solutions (August 2021- May 2024)

- Developed full-featured web applications and admin panels using Next.js, React.js, and Angular
- Worked with both MongoDB and MySQL to design and manage scalable databases for dynamic web apps
- Built robust RESTful APIs to power frontend and backend communication efficiently
- Integrated Stripe Payment Gateway for secure and seamless online transactions
- Implemented Zoom integration for live video features, including meeting scheduling and real-time communication

Full Stack Developer

iTech Mission (July 2020-July 2021)

- Collaborated with senior engineers to design, develop, and maintain scalable web applications using the MEAN / MERN stack (MongoDB, Express.js, Angular, React, Node.js)
- Assisted in building RESTful APIs with Node.js and Express.js, focusing on performance, scalability, and security
- Participated in the development of responsive, user-friendly interfaces using Angular, HTML, and CSS
